IMPROVEMENTS FOR KLEINBEGIN KLEUTERSKOOL

The Onseepkans community celebrated essential upgrades at Kleinbegin Kleuterskool, one of the community's key ECD centres. Along with other local solar plants, we helped transform the school by providing funding to refurbish classrooms and improve playground safety.

"We contributed to repairing structures and adding educational murals, creating a safer and more engaging learning environment." - Harrisinah Theka, Economic Development Specialist

These upgrades are expected to enhance early childhood development, offering the children a nurturing space to learn, play, and grow confidently.

This project is part of Konkoonsies Solar Power's ongoing efforts to support quality education for young children in rural communities.

GRANT FUNDING FOR LOCAL ENTREPRENEUR

Nicolette Josop's mobile kitchen business, Ini Hoeki Mobiele Koswa, has taken off, thanks to access to grant funding. The funding support forms part of our programme designed to develop small businesses in rural areas like Onseepkans, creating jobs and boosting the local economy.

"The assistance from the solar plant has been vital for starting our business."
- Nicolette Josop

With ongoing support for compliance and growth, her business is set to thrive, serving the community at local events while creating employment opportunities and stimulating local enterprise development.

A DECADE OF CLEAN ENERGY AND GROWTH

In 2024, we celebrated 10 years of clean energy generation! Since powering up in 2014, we've exceeded our ambitious water-saving targets, set a number of years ago, through industry-leading programmes and avoided about 6,160 tonnes of CO2 emissions each year.

We look forward to continuing our support for South Africa's energy future and are excited to see what the next decade holds!
